

Solar Polarization Workshop 8

Firenze, 12 – 16 September, 2016

List of contributions

Session 1: Physics of polarization

Review talks

1. Casini, Roberto
Egidio Landi: a life in the science and teaching of polarimetry

Standard talks

1. Bommier, Véronique
Non-perturbative theory of radiative scattering in the weak radiation field limit
2. Frisch, Helene
Some analytic results on Rayleigh scattering and resonance polarization
3. Landi Degl'Innocenti, Egidio
Relaxation phenomena due to collisions with neutral perturbers in hyperfine structure multiplets
4. Mao, Jirong
Relativistic electrons radiation/polarization in random and small-scale magnetic fields
5. Sahal-Bréchet, Sylvie
Collisional broadening and collisional depolarization of spectral lines: similarities and differences
6. Sowmya, Krishnamurthy
Partial frequency redistribution theory with Paschen--Back effect - application to Li I 6708 Å lines
7. Stenflo, Jan
The Kramers-Heisenberg coherency matrix
8. Supriya, Dayananda
Effects of lower-level polarization and partial frequency redistribution on Stokes profiles

Session 2: Modeling of polarization in the atmospheres of the Sun and other stars

Review talks

1. Nagendra, Kanakatte
Polarized Line Formation: Methods and Solutions
2. Trujillo Bueno, Javier
The last twenty years: a review on optically polarized atoms in the solar atmosphere

Standard talks

1. Alsina, Ernest
The transfer of resonance line polarization with PRD in the general Hanle-Zeeman regime
2. Belluzzi, Luca
Modeling the enigmatic scattering polarization signal of the NaI D1 line
3. Calvo, Flavio
Linear polarization of the solar continuum spectrum
4. Carlin Ramirez, Edgar
Modelling of chromospheric Hanle and Zeeman polarization in time and space

5. del Pino Alemán, Tanausú
A theoretical investigation of the scattering polarization in far ultraviolet lines with different sensitivities to the Hanle effect
6. Janett, Gioele
Numerical methods for the formal solution of the radiative transfer equation for polarized light
7. Kostogryz, Nadiia
Center-to-limb continuum polarization in solar and stellar atmosphere
8. Manso Sainz, Rafael
Magnetic Field Diagnostics with Strong Chromospheric Lines
9. Sampoorna, Malali
Comoving Frame Methods for Polarized PRD Line Transfer with Velocity Fields

Posters

1. Anusha, Lokanathapura S.
Spatial structuring in the scattering polarization line profiles in the solar chromosphere
2. Gunár, Stanislav
3D Whole-Prominence Fine Structure model as a test case for verification and development of magnetic field inversion techniques
3. Stepan, Jiri
Modeling the scattering polarization of the hydrogen Ly-alpha and Si III lines observed by CLASP in a filament channel
4. Yang, Zhiliang
The Relation between the magnetic field and rotation of sunspots

Session 3: Polarimetry as a diagnostic tool for stellar atmospheres

Review talks

1. Berdyugina, Svetlana
Polarized Scattering due to Molecules, Particles and Biopigments in Stellar and Planetary Atmosphere

Standard talks

1. Asensio Ramos, Andrés
Modern inversion codes for Stokes parameters
2. Li, Hao
Polarization of coronal forbidden line
3. Martínez González, Maria Jesús
Measuring the global field of the Sun and other stars with the Hanle effect
4. Milic, Ivan
Response function for NLTE lines
5. Raouafi, Nour E.
Diagnostics of Coronal Magnetic Fields Through the Hanle Effect in UV and IR Lines
6. Scalia, Cesare
Measuring the effective magnetic field of cold active star Eps Eri using the slope method

7. Smitha, Narayanamurthy
Measurement of solar magnetic fields using multi-pair Stokes V line ratios

Posters

1. Dima, Gabriel
Hanle coronal magnetometry using permitted HeI 1083nm and forbidden SiX 1430.1nm IR emission lines
2. Fabbian, Damian
Internetwork magnetic flux density in 3D magneto-hydrodynamic simulations and observations
3. Fabbian, Damian
Physical and observable parameters derived from 3D magneto-convection simulations of the Sun's photosphere
4. Gangi, Manuele Ettore Michel
Detection of liner polarization in strong metal lines of 89 Herculis
5. Sampurna, Malali
Polarized scattering matrix for magnetic dipole transitions
6. Vieu, Thibault
How to infer the Sun's global magnetic field using the Hanle effect

Session 4-I: Ground-based polarization measurements: observations, analysis and interpretation

Standard talks

1. Balthasar, Horst
Spectropolarimetric Observations of an Arch Filament System with GREGOR
2. Bianda, Michele
Second Solar Spectrum observations with ZIMPOL
3. Deng, Linhua
New Vacuum Solar Telescope Observations of Solar Fine-scale Structures in the Lower Atmosphere
4. Díaz Baso, Carlos José
Inference of magnetic fields in an active region filament
5. Ji, Haisheng
The results from NST's observation --- Magnetic activities
6. Jurcak, Jan
The intensity and polarization of the Ca II 8542 line in the quiet Sun: spectro-polarimetric observations vs. 3D radiative transfer modelling
7. Murabito, Mariarita
Formation of the penumbra and start of the Evershed flow
8. Pastor Yabar, Adur
Magnetic topology of the North solar pole
9. Rachmeler, Laurel
Coronal polarization of pseudostreamers and the solar polar field reversal
10. Schlichenmaier, Rolf
The fine-structure of a faint sunspot light bridge

11. Tessore, Benjamin
Spectropolarimetric study of red supergiant stars
12. Yan, Xiaoli
The change of photospheric magnetic fields before filament formation and eruptions

Posters

1. Balthasar, Horst
Near-infrared spectropolarimetry of the trailing sunspots of NOAA 12396
2. Bello González, Nazaret
New insights on penumbra formation - The origin of the counter-Evershed flow
3. Demidov, Mikhail
On the Time Variations of Magnetic Strength Ratios in Different Combinations of Spectral Lines
4. Hanaoka, Yoichiro
Statistical Study of the Magnetic Field in Solar Filaments
5. Hiriart, David
Long Term Photopolarimetric Monitoring of Bright Blazars at San Pedro Mártir Observatory
6. Ramelli, Renzo
Atlas of the solar intensity spectrum and its center to limb variation
7. Ramelli, Renzo
Measurement of the evolution of the magnetic field of the quiet photosphere during a solar cycle
8. Zeuner, Franziska
Fast Solar Polarimeter (prototype): preliminary results of Stokes measurements in the Sr I (4607 Å) line at VTT/TESOS

Session 4-II: Space-borne polarization measurements: observations, analysis and interpretation

Review talks

1. Fineschi, Silvano
Coronal Polarimetry: Future prospects for space- and ground-based observations

Standard talks

1. Anusha, Lokanathapura S.
Evolution of quiet-Sun small scale magnetic features using Sunrise observations
2. del Toro Iniesta, José Carlos
On the role of convectively driven sinks on magnetic field evolution in the quiet Sun
3. Fischer, Catherine
Temporal evolution of an exploding granule and its surrounding magnetic elements
4. Gorobets, Andriy
Markov fluctuations of the magnetic concentrations in the quiet Sun
5. Guglielmino, Salvo L.
On the magnetic nature of solar exploding granules

6. Ishikawa, Ryohko
Comparison of the Scattering Polarization Observed by CLASP; Possible indication of the Hanle Effect
7. Kahil, Fatima
Brightness of solar magnetic elements as a function of magnetic flux at high spatial resolution
8. Kaithakkal, Anjali
Moving Magnetic Features around a Pore
9. Kano, Ryouhei
Lyman-alpha scattering polarization observed with the Chromospheric Lyman-Alpha Spectro-Polarimeter
10. Solanki, Sami
First results from the second science flight of Sunrise
11. Stepan, Jiri
CLASP: Lyman-alpha spectropolarimetric observations versus radiative transfer modeling

Posters

1. Di Serego Alighieri, Sperello
The conventions for the polarization angle
2. Narukage, Noriyuki
Temporal variation in the Ly-alpha linear polarization observed with the CLASP sounding rocket
3. Strecker, Hanna
Sunspot decay: Transition from moat flow to supergranular flow cell

Session 5: instrumentation for polarization studies

Review talks

1. Cao, Wenda
The 1.6 Meter New Solar Telescope at Big Bear Solar Observatory

Standard talks

1. Ahn, Kwangsu
Calibration of the Instrumental Crosstalk for the Near-IR Imaging Spectropolarimeter at the NST
2. Baur, Tom
New Optical tools for polarimetry and polarization control
3. Berrilli, Francesco
The calibration pipeline for the MOTH II - Magneto Optical filters at Two Heights
4. Demidov, Mikhail
On the cross-calibration of the HSOS SMAT full disk longitudinal magnetograms with data sets from some other instruments
5. Harrington, David
DKIST Polarization Modeling and Performance Predictions
6. Hou, Junfeng
Spectral-modulation-based polarization calibration method for AIMS telescope

7. Landini, Federico
PENCIL: a wire grid polarimeter at 121.6 nm
8. Qu, Zhongquan
Progresses in Shaping Fiber Arrayed Solar Optic Telescope(FASOT)
9. Sueoka, Stacey
Progress in modeling polarization optical components for the Daniel K. Inouye Solar Telescope
10. Yuan, Shu
Polarization modeling for the main optics of Chinese Giant Solar Telescope

Posters

1. Anan, Tetsu
Developments of a spectro-polarimeter observing multi-wavelength windows simultaneously at Hida observatory
2. de Wijn, Alfred
First results from the Chromosphere and Prominence Magnetometer ChroMag
3. Ichimoto, Kiyoshi
Application of New Birefringent Tunable Filters at Hida Observatory
4. Kvernadze, Teimuraz
Polarization-holographic imaging Stokes polarimeter for observational study of the Sun
5. Lin, Haosheng
Tomographic Mission from Space to Disentangle the 3D Magnetic and Thermodynamic Structures of the Solar Corona
6. McKenzie, David
CLASP2: The Chromospheric Layer Spectro-Polarimeter
7. Shen, Yuandeng
Fine Magnetic Structure and Origin of Counter-streaming Mass Flows in a Quiescent Solar Prominence
8. Wang, Dongguang
Lyot Filter Based on Liquid Crystal Variable Retarder
9. Xin, Yuxin
Polarimetric Measurement System of Lijiang 2.4 meter telescope
